

Please Make Sure Your

Bottles are Clean and Empty

Did you know that all plastics are not recyclable, even if they say they are for advertising purposes? And that if non-recyclable (dirty) materials are mixed in with the good recyclable materials, the good recyclable materials get contaminated and sent off to the landfills!

Not Recyclable:

- Plastic Bags
- Styrofoam of Any Kind
- PVC Piping
- Food Containers with leftover food in it
- Diapers with Fecal Matter (Poop) in them
- Bottles with Liquid in them (Spit Bottles)
- Aluminum Foil
- Used Paper Plates, Paper Towel Used Tissue Paper
- Hazardous Chemicals
- Light bulbs
- Mirrors, Window Glass, Ceramic, pottery, Coffee Mugs
- Cat Litter
- Multi-Purpose Containers (Pringles)
- Clothes Hangers
- Kids Toys

Please make sure to separate your recycling!

Separation saves time and money

If using two bins (preferred method) Glass, Tin, Aluminum and Plastic in one bin and Paper and Cardboard in the other. If only using one bin please put your Glass, Tin, Aluminum and Plastic at the bottom and Paper and Cardboard on the top.

By taking less we can recycle more!

Please remember someone must physically touch EVERYTHING that is in the bin. If you do not want to touch, we do not either!
